

Reflective Interior Films

Bold, efficient, high energy saving films

Solar

Avery Dennison's reflective range of interior window films by Avery Dennison provides a strong visual statement that delivers outstanding energy efficiency, comfort and value. By rejecting excess solar radiation, **R Silver**, **R Silver Low E** and **R Silver Safety** interior window films cut heat buildup entering through windows which means cooler, more enjoyable building interiors and reduced costs for cooling.

Avery Dennison's Reflective interior films are popular for commercial projects thanks to their exceptional appearance, effective heat rejection, and impressive return on investment.

R Silver i

R Silver i interior window films are designed for attractive appearance and excellent solar heat rejection. Competitively priced, this range of window films are particularly popular for use in commercial projects. **R Silver i** interior window films are available in different VLT's.

R Silver i Low E

Avery Dennison's **R Silver 20i Low E** provides year-round comfort and energy efficiency. During winter, the exceptionally reflective interior layer of **R Silver i Low E** maintains interior heat where it's needed, keeping rooms comfortable. In the summer, the window film's reflective outer layer rejects solar heat from entering into the room, reducing heat buildup and maintaining cool interior temperatures.

Features and Benefits

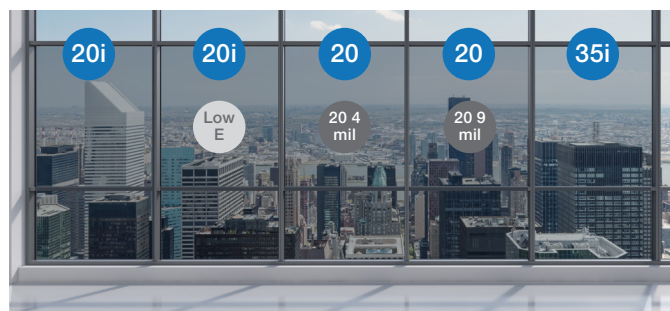

All **R Silver i** Window Film Products provide:

- > 99+% UV block limits fading and damage from the sun
- > High level of heat rejection saves costs associated with building cooling
- > Excellent solar heat and glare rejection for enhanced comfort
- > Works immediately - no waiting to enjoy return on investment
- > Bold appearance upgrades building exterior and maintains daytime privacy

R Silver Safety

These **R Silver Safety** Reflective interior window films combine the reinforced protection of security laminates with superb heat rejection, UV block, and a sophisticated appearance. **R Silver 20 Safety** range of film thicknesses includes 4 and 9 mil to provide the appropriate solution for different security threats.
